

# Nix

- Lix is preferred: <https://lix.systems/install/>
  - Works with NixOS and Home-Manager as it's a drop-in replacement.
  - Also flake support should be enabled.

## Configuration on non-NixOS systems

By default if installed (at least when installing Lix), nixpkgs points to the unstable channel. To change this, open the file `/etc/nix/nix.conf` and edit the line starting with `extra-nix-path =` to this (might need a more up-to-date path)

```
extra-nix-path = nixpkgs=flake:nixpkgs/nixos-24.05
```
